

W17E 002 is a 6.5 " Woofer/Midrange unit with an extremely stiff, yet light injection moulded magnesium cone which gives tremendous bass precision and midrange detail.

Other features :

- * Heavy copper rings and phaseplug, mounted in the magnet system to reduce distortion.
- * Stiff and stable injection moulded chassis from high purity magnesium.
- * Gold plated terminals for long term stability.
- * Copper plated top and bottom plates.

T25 001 is a 25mm fabric dome tweeter with a stiff 6mm machined aluminium chassis. The unit features moderately high efficiency and smooth, extended response due to an optimum shaped SONOTEX diaphragm.

Other features :

- * Silver wire voice coil to improve electrical conductance.
- * Flexible lead out wires.
- * Gold plated terminals for long term stability.
- * Low viscosity magnetic fluid with good cooling effect.
- * Complex internal damping and injection moulded rear chamber.
